Darkslide

Overview

Generate HTML5 slideshows from markdown, ReST, or textile.

Darkslide is primarily written in Python, but it's themes use:

- HTML5
- Javascript
- CSS

Code Sample

Darkslide supports code snippets

```python
!python
def log(self, message, level='notice'):
    if self.logger and not callable(self.logger):
        raise ValueError(u"Invalid logger set, must be a callable")

    if self.verbose and self.logger:
        self.logger(message, level)
```
